

C-112777

I oppose CALFED's plan to increase surface water storage in the Sacramento River and its tributaries to support agriculture, urban consumption, and recreation. This could be done by subdividing the Sacramento River into smaller reservoirs and bypassing water conveyance facilities to reduce water use. Instead of building new dams and canals, I urge CALFED to expand

diversions from the Sacramento River and McCloud Rivers. The proposed sites downstream would flood segments of the upper Sacramento River and its tributaries. CALFED's plan to raise Shasta dam existing dams or building new off-stream storage would increase water storage in the Sacramento Valley by capturing

Dear Mr. Snow,

Thank you for your time and
consideration.

I problem could be solved by
creating more dams.

Creating flats for fish, wild life, and
increasing water levels helped and increasing
levels as mentioned below, such as
such as the English Bar flat dam, that acts as
a filter including removing some facilities.
